

AMENDMENTS TO THE CLAIMS

1. (Original): A camera mount comprising:
a hosting device including a flat surface for mounting a camera including a user
interface;
a hollow post on said flat surface wherein said post is sized to fit within a
mounting hole of the camera;
a trigger device for raising and lowering a first connector located within the hollow
post wherein said first connector mates with a complementary connector
located within the mounting hole of the camera; and
wherein the user interface of the camera also functions as the user interface of the
hosting device.

2. (Original): The camera mount of Claim 1, wherein the first connector is coupled
to a power source within said hosting device.

3. (Original): The camera mount of Claim 1, wherein the first connector is
coupled to a memory device within said hosting device.

4. (Original): The camera mount of Claim 1, wherein the first connector includes
pins for data connections to a memory of the camera.

5. (Original): The camera mount of Claim 1, wherein the first connector includes
pins for power connections to a power supply of the camera.

6. (Original): The camera mount of Claim 1, wherein the first connector is located
within said hollow post.

7. (Original): The camera mount of Claim 1, wherein the trigger device is coupled
to a mechanical linkage for raising and lowering the first connector.

8. (Original): The camera mount of Claim 1, wherein the post press-fits snugly
into the mounting hole of the camera.

9. (Original): The camera mount of Claim 1, wherein the post is threaded.

10. (Original): The camera mount of Claim 1, wherein the first connector includes a flag-shaped contact for connecting to a memory of the camera.

11. (Original): The camera mount of Claim 1, wherein the first connector includes a flag-shaped contact for connecting to a power supply of the camera.

12. (Original): The camera mount of Claim 1, wherein the hosting device is a CD Writer.

13. (Original): The camera mount of Claim 1, wherein the hosting device is a printer.

14. (Original): The camera mount of Claim 1, wherein the hosting device is a device that processes digital images.

15. (Currently Amended): A camera mount comprising:
a hosting device adapted to utilize digital images including a flat surface for
mounting a digital camera including a user interface;
a first connector on said flat surface wherein said first connector mates to a
complementary connector located on the digital camera; and
a processor in the hosting device adapted to communicate an identifier to the
digital camera that is used by wherein the digital camera user interface of
the camera also functions to define functionality and function as the a
hosting device user interface of the hosting device.

16. (Original): The camera mount of Claim 15, wherein the hosting device is a CD Writer.

17. (Original): The camera mount of Claim 15, wherein the hosting device is a printer.

18. (Original): The camera mount of Claim 15, wherein the hosting device is a device that processes digital images.

19. (New): The camera mount of Claim 15, wherein the hosting device is a CD Writer and the processor in the CD writer is adapted to interact with a processor in the digital camera to visually navigate through images stored on the CD writer and selectively display the images on a display of the digital camera.

20. (New): The camera mount of Claim 15, wherein the hosting device is a printer and the processor in the printer is adapted to interact with a processor in the digital camera to preview images on a display of the digital camera.
